

ECOMONDO

a mediterranean platform for the sustainable growth

05TH.08TH NOVEMBER 2014
RIMINI - ITALY

18th International Trade Fair
of Material & Energy
Recovery and Sustainable Development

Ecomondo presentation seminar at the Amman Chamber of Commerce, June 15th 2014, Amman

Hemispheres Wbd and the Amman Chamber of Commerce, in collaboration with the Jordan Investment Commission and Riminifiera Spa, are glad to invite you to the presentation seminar **"Ecomondo, 18th International Trade Fair of Material & Energy Recovery and Sustainable Development"** that will take place in Amman on 15 June 2014 at 10.00 a.m. at the Chamber of Commerce of Amman.

Goal of the seminar is to highlight the main features of Ecomondo exhibition that will take place in Rimini, Italy, from 5 to 8 November 2014 and promote the participation of Jordanian companies and Institutions. A huge package of incentives is available to allow the Jordanian entrepreneurs to participate in.

Ecomondo is:

- *the platform of reference for the Mediterranean basin dedicated to the international strategies for renewable ecological innovation and the transformation of waste into a resource.*
- *the ideal forum where exhibitor companies can meet enterprises, national and international public/private partners and new target clients from industry, services, construction, green energies, public service administrations and utilities.*
- *the most extensive showcase in the whole of the Mediterranean area where the most efficient technical solutions for the innovative management and exploitation of waste in all its forms are on display, as well as those for water-saving measures, for the efficient use of waste and raw or secondary materials, and for energy efficiency.*
- *the principal B2B and R2B meeting point for operators in the Mediterranean area where national and international experts can delve into the technical problems linked to green energies, the*

management of waste in the priority industrial sectors (ground, air), environmental protection and restoration, sustainable transport and the technological priorities of smart cities.

- *the highly qualified hub for national and international Training - Information - Refresher Courses - Innovation - Research and Development*

The sectors and the company involved are the following:

<u>WASTE AND RAW MATERIAL MANAGEMENT</u>	<u>ENERGY GENERATION FROM RENEWABLE SOURCES</u>
<ul style="list-style-type: none">• Waste treatment• Valorization, recovery and recycling of waste• Collection and transport of waste• Utilities companies• Equipment and facilities for the treatment of water, air and waste• Integrated management• Chemical-Pharmaceutical industry• Production and processing of metals• Oil and gas industry• Plastics and rubber industry• Paper, cardboard industry• Wood industry• Ministries and institutions concerned with environmental issues	<ul style="list-style-type: none">• Biofuels• Biogas• Biomass• Wind power• Photovoltaic• Geothermal• Hydroelectric• Solar heat• Use of waste as an energy source• Cogeneration and regeneration• Distributed generation and micro generation
